Placement officer View Applicants Page

Student View Jobs Page

Student Application Page

### **Setup**

Unzip the code to your htdocs folder.

Restore the database contained in the database folder.

Open your browser and enter “localhost:<your apache port>\WorkPlacementApp\”

Hit Enter on the keyboard run the application

## **Application Instructions**

This application provides controllers for 4 types of user:

- User not logged in
- Administrator
- Student
- Placement officer

The users have different registration email pattern

### **Administrator:**

Email: admin@lit.ie

Password: Password12345

### **Students:**

Email: K00253718@student.lit.ie

Password: Password12345

### **Placement Officers:**

Email: firstname.lastname@lit.com

Password: Password12345

The database contains only 6 tables:

- Administrator
- Students
- Placement\_Officer
- Jobs
- Applicants
- Chat\_Room

## **Demonstration**

Numbered screenshots to demonstrate the code in operation- every page and menu item. Numbers should refer to specification as detailed in deliverable 2.

## **Test Data**

A list of any data required to run the application- eg. Usernames and Passwords- required to run the application
